Pixel Creation (Events Manager, Manually)

Steps:-

1. Go to meta event manager
2. From Left Menu bar click on Event Manager
3. Go to next step of clicking on “Data Connect”
4. Select any options for which we want to set meta event Now I have selected for Website ~ Meta Pixel
5. Name the Meta Pixel Business
6. Paste Website URL for check
7. Window will pop up choose option do it by yourself click on next
8. Window will pop up, check the “meta pixel only” Next
9. Window will pop up with option will choose manually add pixel code to website

Manual Installation via Code:

10. Copy the **Meta Pixel Base Code** from Events Manager
11. Go to your website backend (WordPress/Shopify)
12. Paste the code inside the <head> section of your website
13. Save changes

Install Base Code

The pixel code is a snippet of javascript that's added to the header section of your website. The pixel has two parts: the basecode and the event tags.

1 Copy base code

Copy the base code below.

```
<!-- Facebook Pixel Code -->
<script>
!function(f,b,e,v,n,t,s)
{var d=document,l=document.createElement('script');l.async=true;
l.src=v;f._fbq=f._fbq||[];f._fbq.push([n,t,s]);d.head.appendChild(l);}
```

Copy Code

2 Paste base code to website

Paste the pixel code into the bottom of the header section just above the </head> tag. Install the base code on every page of your website. [Learn more](#)

Google Tag Manager (GTM) Method

Steps:

1. Open **Google Tag Manager**
2. Click **Add New Tag**
3. Select **Custom HTML Tag**
4. Paste Meta Pixel Base Code
